

# TEKREX<sup>®</sup>

## Case Studies

# Thinkery Banks

Austin's children's museum, Thinkery, wanted to make a splash with centerpieces at their annual Imaginarium fundraiser. With a focus on STEAM (science, technology, engineering, art and math), a 3D-printed, geometric version of their mascot was a perfect fit – but where to start?

Challenge

## Our Solution

Charting a course of action based on a paper model and a preferred color palette, TekRex went through several iterations for a functional piggy bank that could be produced in volume quickly and under the nonprofit's budget.

## Results

The models were a hit, and 50 models were auctioned off with all proceeds benefiting Thinkery. With the help of the piggy banks, their event was hugely successful and the TekRex team was happy to contribute to Thinkery's mission to equip and inspire the next generation of problem solvers.
